“she’s just a girl...” “touched the ground at JFK...”
 “only love can break...” “the reflex...” “sketch the trees...”
 “I wish I could...” “I ain’t pass the bar...”
 “have a baby by me...” “New York is a go go...”
 “fly me to the moon...” “in my life there has been...”
 “then I hear babyface...”
 “when did you stop loving me... when did I...”

Show Time.

How best can we describe the improvements made to the DG, DGX and DGX-W?

Better, Better and Better.

Simply put, every single raw component used to create these three new phenomenal products is of the highest quality.

No expense has been spared, right from the inner circuitry, the digital mother-boards, the class D amplifiers, the sturdy speaker cones, the unique first race-track subwoofers, the heavy duty aluminum casings, the feather touch control interfaces.

And for the sound, the all important sound, it emanates, radiates and permeates with a growl of distinction from the belly of these two sound beasts. A growl of recognition and belonging.

Hyperbole?

We think not?

Design in passion?

Evidently.

Are you ready?
